BRIGHTWATER MILLS LTD
IT Steering Committee – minutes of the meeting held on 14 July 2026
CONFIDENTIAL. Internal use only. Do not forward outside Brightwater Mills.

Present: Helen Ward (Operations Director, chair), Raj Patel (IT Manager), Tom Okafor (Finance Controller), Ana Silva (Quality Lead).
Apologies: none.
Agenda: 1. Production planning. 2. Quality data. 3. Orders and finance. 4. Plant infrastructure. 5. Any other business.

1. Production planning
Raj Patel: The production planning tool MillPlan schedules every milling run. MillPlan sends the daily production plan to the plant control system at 05:00 each morning.
Helen Ward asked whether the plan can be changed after it is sent.
Raj Patel: Changes after 05:00 are phoned through to the shift supervisor and are not recorded in MillPlan.

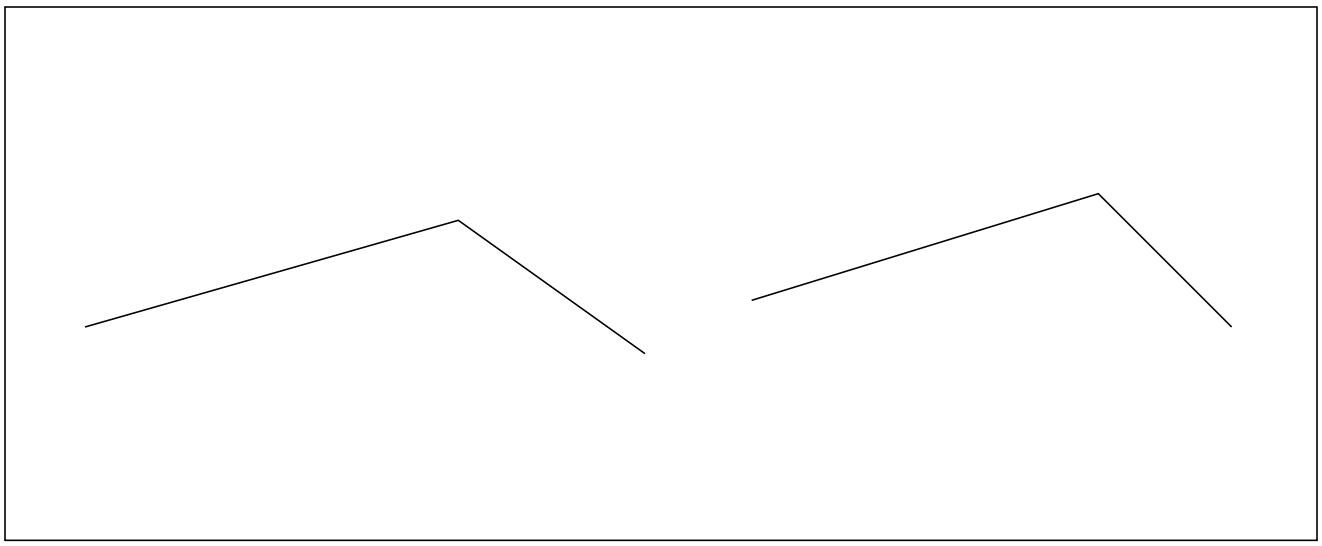
2. Quality data
Ana Silva: Every batch is tested in the lab before it is released. Lab results are recorded in LabTrack. LabTrack is a spreadsheet-based tool, and it is maintained by one person in the quality team.

3. Orders and finance
Tom Okafor: Sales orders and invoices are held in LedgerOne, the ERP we rent from the vendor. The ERP pushes confirmed sales orders into MillPlan every hour.
Raj Patel confirmed that the hourly order feed has failed twice this year without anyone noticing until the next morning.

4. Plant infrastructure
Raj Patel: The plant control system runs on two servers on the mill floor. One of the two servers is out of vendor support.
Decision: IT will propose a replacement for LabTrack by the end of Q1 2027.
Decision: IT will price a supported replacement for the mill floor server.

5. Any other business
None.

Attachment A – systems overview (as supplied by IT)

System	Purpose	Business owner	Hosting
MillPlan	production planning	Operations	on-premise
LedgerOne	orders, invoicing, finance	Finance	vendor cloud
LabTrack	quality lab results	Quality	shared drive
PlantControl	mill line control	Engineering	mill floor servers


Actions
R. Patel – LabTrack replacement proposal – Q1 2027.
R. Patel – price a supported mill floor server – next meeting.
Next meeting: 13 October 2026.
